Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed "at least about" language. Agreed that "at least" provides the lower end of the range while "about" gives that lower end a little variability to allow for error in the measurements of activity. The range of activity covered by "about" could be derived from the error values obtained in measurements of thrombin inhibition as shown in Table 3, p. 57 of the Specification.
